<u>Amendments to the Claims</u>:

This listing of claims will replace all prior versions, and listings, of claims in this application.

<u>Listing of Claims:</u>

Claims 1-29 (cancelled).

Claims 30-34 (withdrawn).

Claim 35 (cancelled).

36.   (Currently amended):   A computer program product for use with a data processing system for monitoring and evaluating guard patrols of one or more sites, said computer program product comprising:

a)   a computer usable medium including:

1)   computer readable program code means embodied in said <u>computer usable</u> medium for gathering information obtained from one or more checkpoints during a guard patrol of one or more sites<u>, said checkpoints being non-prioritized permitting said information to be gathered in any sequence</u>;

2)   computer readable program code means embodied in said <u>computer usable</u> medium for detecting when said gathered information is ready to be downloaded into said data processing system; and

2

3) computer readable program code means embodied in said computer usable medium for downloading said gathered information into said data processing system; and

b) computer readable program code means for printing one or more reports to a printer of said information obtained from one or more checkpoints during a guard patrol, said reports comprising customization selected from the group consisting of logos, cover sheets, photographs, detailed headings, bitmaps, watermarks, drawings, illustrations, trademarks, and patrol statistics.

37. (Currently amended): A computer program product for use with a data processing system for monitoring and evaluating guard patrols of one or more sites, said computer program product comprising:

a) a computer usable medium including:

1) computer readable program code means embodied in said computer usable medium for gathering information obtained from one or more checkpoints during a guard patrol of one or more sites, said checkpoints being non-prioritized permitting said information to be gathered in any sequence;

2) computer readable program code means embodied in said computer usable medium for monitoring the gathering of

3

said <u>information and</u> detecting when said gathered information is ready to be downloaded into said data processing system; and

3) computer readable program code means embodied in said <u>computer usable</u> medium for downloading said gathered information into said data processing system; and

b) computer readable program code means for downloading said gathered information into said data processing system independently of said computer program product.
